CHOOSE THE PERFORMANCE OF
XFLEX X6 HIGH-TECHNOLOGY MODULAR SOLUTION
VERSATILE • RELIABLE • TECHNOLOGY

THE RIGHT CHOICE
The new XFlex X6.0 is the natural evolution of the renowned XFlex X6 printing line, the real step towards digital workflow and independent process. It is going to set higher standards in performance and quality by preserving the strong points that made XFlex X6 the best narrow-web platform in the market and integrating them with state-of-the-art technologies and automation.

XFlex X6.0 line enhances the potentiality of flexo printing and provides printers with the opportunity to improve their production potential and extend their product portfolio with top quality results and guaranteed return of investment.

YOUR NEW WAY OF PRINTING

XFlex X6 line is able to integrate several printing and converting technologies in-line and process all kind of substrates, from 12-micron film to light carton, producing many type of applications to satisfy the requests of different target markets.

PRINTABLE MATERIALS

- PS PAPER AND FILM
- UNSUPPORTED PAPER
- UNSUPPORTED FILM
- LIGHT CARTON
- ALUMINUM
- LAMINATES
- MULTI-LAMINATES

TARGET MARKETS

- WINE & SPIRITS
- FOOD & BEVERAGE
- HOUSEHOLD
- INDUSTRIAL
- HEALTHCARE
- COSMETICS

END-USE APPLICATIONS

- SELF-ADHESIVE LABELS
- WET-GLUE LABELS
- MULTI-LAYER LABELS
- WRAPAROUND LABELS
- SHRINK SLEEVES
- LIDS
- TAGS & TICKETS
- IML
- FLEXIBLE PACKAGING
- LAMITUBE
- POUCHES & SACHETS
The integration of Digital Servo Drives enables very accurate set-up operations and automatic on-the-fly pre-registration of the plates to get them in position simply by pressing a button, with no waste of time and material.

**DIRECT DRIVE**

Flexo Direct Drive technology and gearless concept eliminate even the smallest imperfection and allow the press to reach the purest quality with no backlash and perfect register stability, even at the highest production speeds.

**MULTI-PROCESS**

XFlex X6 modular design allows to combine and implement in-line, with no limitations different printing technologies, as well as special finishing applications and converting units, to always get to the final product in one single passage.

**ROCK'N'ROLL DUAL FUNCTION**

High-efficiency stripping unit suitable for any kind of label shape. Thanks to its double operational capability, it is able to work either as tower-style or contact-style stripping station, guaranteeing smooth die-cutting operations even at high speeds and with all kinds of materials.

**MAIN FEATURES**

### AUTOMATIC IMPULSE

**A.I.R. FLEXO (Automatic Independent Registration)**

The integration of Digital Servo Drives enables very accurate set-up operations and automatic on-the-fly pre-registration of the plates to get them in position simply by pressing a button, with no waste of time and material.

### MULTIVISION

Color-to-Color automatic register adjustment and control based on a multiple camera scanning system. It can control both machine and cross side of each single printing unit in real time and get the machine ready to print in less than 1 minute, generating nearly no waste.

### CRUISE CONTROL

The X6.0 guarantees an intelligent printing process with the automatic positioning of the printing pressures at every change of speed, substrate thickness and repeat length thanks to motorized pressure setting of both the anilox roll and the impression cylinder. The "No Panic" function gives the possibility to automatically reset the pressures and return to the initial settings by pushing a simple button.

### TRUSTED QUALITY

### THE FLEXO PRINTING UNIT

The key strength of XFlex X6.0 is the new flexo station, conceived to redefine the way of printing with an automatic process, from start-up to job changeover. X6.0’s renewed flexo stations feature automatic pressure adjustment and cruise control, with the capability to input automatically the printing parameters at each job changeover, variation of material or production speed, setting unmatchable quality standards in label and packaging printing.

### VERTICAL FLEXO CONFIGURATION

- water base/solvent base - uv/uv led

### FLEXO CONFIGURATION

- water base - uv/uv led

The key strength of XFlex X6.0 is the new flexo station, conceived to redefine the way of printing with an automatic process, from start-up to job changeover. X6.0’s renewed flexo stations feature automatic pressure adjustment and cruise control, with the capability to input automatically the printing parameters at each job changeover, variation of material or production speed, setting unmatchable quality standards in label and packaging printing.
A complete restyling and a modern interface with touchpad controls makes the press even more user-friendly, ergonomic and intuitive, offering the operator a new working experience and the comfort of an automatic and independent process.

The Transparent Factory Cloud is a digital data management software enabling the access to all the productive information of OMET machine.

It helps the printer control and manage the daily production in order to better support the planning and improve the efficiency of the entire production process.

OMET Twist is the special die-cutting station intentionally designed for a smooth and effortless changeover operation. It can simplify the operator’s life and minimize set up time, thanks to the Easy-Change Die system, which enables carrying out every job changeover with a simple move, through the innovative In&Out sliding system.

DATA REPORT

ALARM DIAGNOSIS
XFlex X6 Offset Sleeve is the expression of all the potentiality offered by OMET innovation in the narrow-web printing market.

OMET Offset printing technology is a real value add for the production of high-end labels and flexible packaging.

Thanks to its unique variable-repeat sleeve technology, XFlex X6 Offset addresses especially to converters looking for a high-performance press able to provide the best quality in long runs, but also high efficiency in short-run jobs, in terms of pre-press cost savings and operational flexibility.

Value to Your Product

**Real Variable Size Offset**

**Main Features**

**Easy Sleeve Format Change**

This innovative system is based on OMET patented sleeve technology with automatic pressure adjustment, which guarantees quick repeat changeovers and user-friendly operations.

**Variable Size Concept**

X6 Offset features infinitely variable print repeat, ranging from 14’’ to 25’, the widest on the market. The smaller sizes of the sleeves, and the low cost of the plates, give the possibility to cut equipment costs and have consistent advantages even in short-run jobs.

**RFID Sleeves**

OMET Offset unit works with pneumatic locking sleeves available with fiberglass, aluminum or carbon fiber external tube and integrated RFID identification system for digital pre-press workflow.
The Offset printing unit patented by OMET is the result of an innovative engineering design conceived to reach the best print quality with the maximum operative efficiency, thanks to:

**High-precision ink distribution**
- Fully motorized and remotely controlled ink fountain blade with independent sectors.

**Homogeneous ink flow**
- Ink train system composed by 21 rolls and dampening system with independent adjustment at variable speed.

**Regular movement and perfect stability**
- Independent motors on the repeat sleeves and on the chilled impression cylinder.

**Sharp printing precision**
- Automatic pre-register and register control system.

**User-friendly operation**
- Multi-control station for remote print management and dedicated touch-screen panel on each printing unit.

The versatility of this platform comes from the combination of patented offset technology and the best flexo printing press on the market, creating a real added-value solution for the production of high-end labels and packaging.

The multi-functional capability of XFlex X6 line allows the integration of special finishing units like Rotary Silk-Screen and Flatbed Hot Foil printing, to further enhance the value of the final products.

**COMBO FLEXO / OFFSET PLATE MUNTER**
- New plate mounting station with advanced plate alignment Vision System for sharp precision folding and mounting operations. It can be used for both flexo and offset plates.
HYBRID PRINTING SOLUTION

OMET XJet Powered by Durst is the result of the combination of the renowned OMET flexo quality and digital inkjet printing technology. This hybrid digital/flexo solution merges all the advantages of the two printing technologies in one single press. It widens significantly the range of printing opportunities, adapting the production to changeable market trends like personalization, just-in-time deliveries and final product enhancement.

FULLY INTEGRATED CONFIGURATION

Within OMET XJet Powered by Durst is the only label press with in-line integrated configuration, combining Inkjet technology with OMET flexo units, perfect for pantones and solid printing, plus all finishing and converting units. The printer alone decides which technology to use at every run and the most convenient breakeven point according to daily production.

MAIN FEATURES

ADAPTABILITY

- 3 PRESSES IN 1
  - Get the final product in one single passage
  - Combine digital, flexo print and finishing modules as you wish
  - Print on a wider array of substrates

PRODUCTIVITY

- INCREASE YOUR PRODUCTION BY CUTTING COSTS
  - Get faster ROI with no down-time
  - Choose the most suitable printing process at every run
  - Optimize production time and costs

CUSTOMIZATION

- READY TO MEET ANY NEED
  - Fulfill just-in-time deliveries
  - Product versioning and variable data printing
  - Add strategic value to the final product

MONOTWIN CUT

One cylinder for any shape

The unique variable-size die-cutting unit by OMET, which works with one magnetic cylinder for all label shapes and dimensions and minimizes operational costs and changeover time, thanks to a fully automatic pre-register and register control.

WHEN DIGITAL MEETS FLEXO

When digital meets flexo, the possibilities are endless. OMET XJet Powered by Durst is designed to meet the changing needs of the label industry with its fully integrated configuration and hybrid digital/flexo solution. Whether you need just-in-time deliveries, product versioning, or enhanced final products, OMET XJet is the perfect choice for your printing needs.
XFlex X6 modular units can be combined at will, with no limitations, allowing the implementation of different processes and special finishing applications in-line, to always get the final product in one single passage.

FINISHING & CONVERTING

Hot foil
Servo driven hot stamping system for special metallic effects. Sliding on roll or flattened in-line station.

Cold foil & Lamination
Sliding unit for metallic effect applications and for UV or self-adhesive lamination.

Peel&Seal
Special unit for the production of multi-layer labels, booklets and coupons, up to 3 layers and 7 printed faces.

Delam-Relam
Modular system for printing on adhesive face, featuring web-turning bars for both back and front printing.

Embossing
In-line system for raised or recessed relief images and designs.

Varnishing
Extended web path for in-line UV gloss varnishing.

OMET reserves the right to change machine specifications at any time.
OMET Packaging Printing is located in Lecco, Italy, 50 kilometers north of Milan in a 3,000 square meters area, of which 2,000 square meters dedicated to production. The product portfolio of this business unit includes: narrow and mid web machines /or labels and packaging printing characterized by operational flexibility, efficiency on any job run, versatility on materials and personalized configurations to respond to any customer’s request.

Besides machines, OMET offers complementary services including ancillary equipment, consultancy and accurate pre and post-sales service programs.
