

CHOOSE THE PERFORMANCE
OF OMET **XJET** - THE COMPLETE
HYBRID PRINTING SOLUTION

PERFECT INTEGRATION • ABSOLUTE QUALITY • HIGH PERFORMANCE

**WHEN DIGITAL
MEETS FLEXO**

HYBRID PRINT

TOTAL LABEL & PACKAGING PRINTING SOLUTION

OMET XJET printing press is the extraordinary result of the combination between the renowned OMET flexo quality and DURST digital inkjet printing technology.

This union has realized the perfect hybrid solution able to provide the maximum level of productivity independently from the length of the run. Nobody but the printer decides whether to use flexo or digital, or both of them, according to daily label production and brand's requests, thus **choosing the most convenient technology at every run.**

ADAPTABILITY

3 PRESSES IN 1

Get the final product in one single passage
Combine digital, flexo, finishing and converting modules as you wish
Unlimited flexibility in terms of substrates and range of applications

PRODUCTIVITY

INCREASE YOUR PRODUCTION BY CUTTING COSTS

Get faster ROI with no down-time
Choose the most suitable printing process at every run
Optimize production time and costs

ING SOLUTION

OMET XJET offers an innovative solution able to extend label printer's productivity and erase unnecessary costs.

It is the only label press with in-line multi-process configuration, combining DURST Inkjet technology with OMET flexo units, plus exclusive finishing and converting units to obtain the final product always in one single passage.

OMET XJET is able to merge all the advantages of the two printing technologies in one single press. It widens significantly the range of printing opportunities, adapting the production to changeable market trends like personalization, just-in-time deliveries and final product valorization.

IN-LINE MULTI-PROCESS CONFIGURATION

CUSTOMIZATION

READY TO MEET ANY NEED

Fulfill just-in-time deliveries and test orders
Product versioning and variable data printing
Add strategic value to the final product

HYBRID PRINT

Flexo Unit

OMET Flexo Direct-Drive technology and gearless concept eliminate even the smallest imperfection and allow the press to reach the **purest quality with no backlash and perfect register stability**, at every speed and with any kind of substrate.

Monotwin Cut

The unique **format-free flexible die-cutting unit** by OMET, which works with **one magnetic cylinder for all label shapes** and dimensions and minimizes operational costs and changeover time, thanks to a fully automatic pre-register and register control.

Rock'n'Roll Dual Function

High-efficiency stripping unit suitable for any kind of label shape. Thanks to its **double operational capability**, it is able to work either as tower-style or contact-style stripping station, guaranteeing **smooth die-cutting operations** even at high speeds and with all kind of materials.

ING SOLUTION

Automatic Print Registration

Thanks to the Vision and Multivision automatic register adjustment and the automatic register control, **flexo and digital units are always in perfect registration**, working as a unique printing machine.

Digital Inkjet

Tau RSC is a **high-performance digital inkjet printing platform** with a printing speed of up to 80 m/min at a print resolution of 1,200 x 1,200 dpi. It can feature from 4 to 8 colors (CMYK + W + OVG) achieving outstanding print quality covering **up to 95% of the Pantone color space**.

Digital Workflow

The comprehensive solution **covers all processes from data management to output on the printer** and reporting. Access to the software is browser-based and can be managed from mobile devices without any additional installation.

FLEXO

HYBRID PRINT

Thanks to its **top-class printing system**, OMET XFlex X6 is able to produce from the simplest to the most complex and creative label on a wide range of substrates. Its **unique multi-process technology** makes it the most versatile printing press on the market, able to satisfy any printer's need by offering a **wide range of in-line additional units for printing, high-end finishing and converting**.

XFlex X6

Printing width	340 mm - 430 mm - 530 mm
Printing repeat	12" - 25" (10" optional)
Flexo Print Technology	Direct Drive - Sleeves

XJET DIGITAL WORKFLOW

The XJet hybrid press is powered by Durst Workflow - Label: the perfect guide for a fast and smooth printing process, from print data preparation to final printed product and even more. This system can be extended at any time with a range of modules for variable data printing, ink consumption calculation, high-speed RIP, grid charts and color book compilation and much more. The Durst Workflow Label communication server permits the integration of external MIS/ERP systems as well as web-to-print portals.

Ink Cost (1000)		0.37329541	16.05170

Precise ink cost analysis

Durst Workflow is a user workplace solution for precise calculation of ink consumption as soon as a print job has been created. This permits to know in advance the cost of every job and optimize ink consumption.

Automatic data preparation

Preparing the print data is quick and easy. Automatic options such as mapping and renaming spot colors, producing cutting lines based on a defined shape, allowing for tonal corrections or giving areas a white background, can be applied easily to the print file. No additional graphics program is needed to open the file, thus saving time and boosting productivity. The customer's original data are always preserved and can be restored again if necessary.

Production check-up and analysis

The new Durst Analytics provides users with a comprehensive solution for central monitoring of many printing systems. A user-friendly interface with personalized dashboards provides real-time information about the machine status including all current production parameters.

Variable data printing

Adobe Illustrator plug-ins make it easy to add variable elements such as text, bar codes, images or colors to a print job. When creating a variable element as serial number, it is even possible to manage it without database. Variable text can be made up of one or several colors and can also be aligned to any required shape.

PRODUCTS & APPLICATIONS

Widen your possibilities

A fully hybrid printing press gives you the opportunity to extend your product portfolio as much as you want.

Your imagination and intuition will drive your business to a new level thanks to the flexibility and the reliability of the OMET XJet hybrid solution.
